

Be very clean with products
that Cares and Cleans...

VERA CLEAN

We believe that everyone can have immediate access to healthy hygiene, every day and everywhere they go. We do that through a unique, 4-in-one, cost-effective, plant-based solution that simultaneously **cleans, protects, sanitises, and deodorises** to a hospital-grade standard. We call it **Transformative Cleaning!**

Vera Clean creates a paramagnetic field that repels and reduces the ability for contaminants like bacteria, pathogens, and viruses to bind to the surface, and prevents reinfestation of new contaminants by starving them (which means longlasting hygiene without the formation of superbugs!)

What Makes VERA Different?

Many compounds in cleaning products (chemicals, fragrance, alcohol) are psychoactive, meaning they disrupt the balance in the brain and jeopardize the regulation of the neurochemical systems that create a sense of wellbeing and happiness (Dopamine, Oxytocin, Serotonin, and Endorphins)

VERA Clean promotes health and wellbeing through healthy and holistic cleaning products that cause no harm whatsoever to mental or physical wellbeing.

Most cleaning products are single action only, and must be used in conjunction with other products.

VERA Clean is a multipurpose formula that does everything any cleaning product does and MORE without any cross-reaction.

Almost all cleaning products contain compounds that are harmful to humans, animals, & the environment.

VERA Clean is 100% non-toxic, natural, environmentally safe, and kills 99.9% of germs and pathogens.

Vera Clean Kit stops Cross Contamination!

COST-EFFECTIVE REFILL TABLES

All VERA Clean products are refillable.
Just add water!

All VERA Clean products are refillable with the Vera Concentrate, available in 1L, 2.5L, 5L, and 20L quantities, saving you money long-term. Each bottle has handy gauge on the label to indicate exactly how much concentrate and water to use each refill.

Prices include 10% GST

\$12.10

50mL Vera Pocket Sanitiser

This pocket-sanitiser is perfect for sanitising and cleaning your immediate surroundings and hands on the go.

From 1L Vera Concentrate

No. of refills 100 Cost per refill \$0.31

\$16.50

125mL Vera Handy Sanitiser

Great for barbeques, camping, fishing and picnics.

From 2.5L Vera Concentrate

No. of refills 100 Cost per refill \$0.72

\$19.80

DANGERS OF ALCOHOL

Topical alcohol-based products are absorbed and synthesised through the skin, and then enter the bloodstream. This can be lethal to recovering alcoholics and may trigger a relapse.

This absorption can interact negatively with medications, and cause unpleasant side effects.

Alcohol-based sanitisers are highly flammable and pose a risk due to the ongoing static electricity created by wheelchairs, and open flames from BBQs, Cooking, Candles, and more. Alcohol sanitisers are HIGH risk, especially for the disabled.

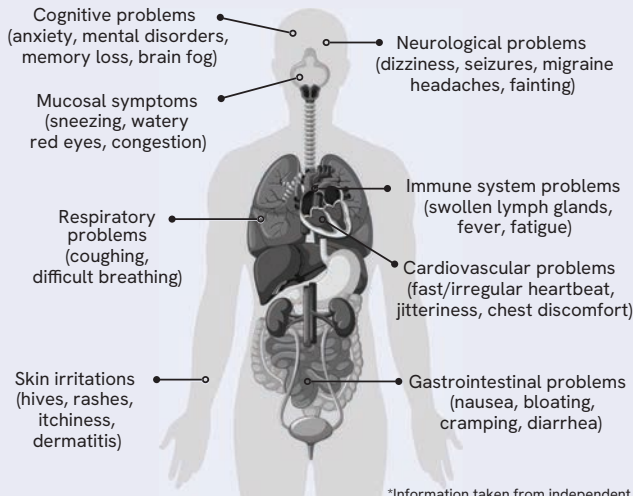

DANGERS OF FRAGRANCE

Fragranced products disturb the body and brain, especially for those with mental health and/or physical difficulties such as: Asthma, Cystic Fibrosis, Respiratory Disorders, Autism, Anxiety, and more. Fragranced chemical cleaners and most commercial cleaners containing chlorine, ammonia, peroxide, and other strong chemicals are not covered by Work Safety Act and Regulation for CSW and Domestic Support for disabled and aged individual homes.

FRAGRANCE SIDE EFFECTS

Long-term exposure can lead to liver and kidney damage, neurological and cognitive damage, and even cancer

*Information taken from independent studies

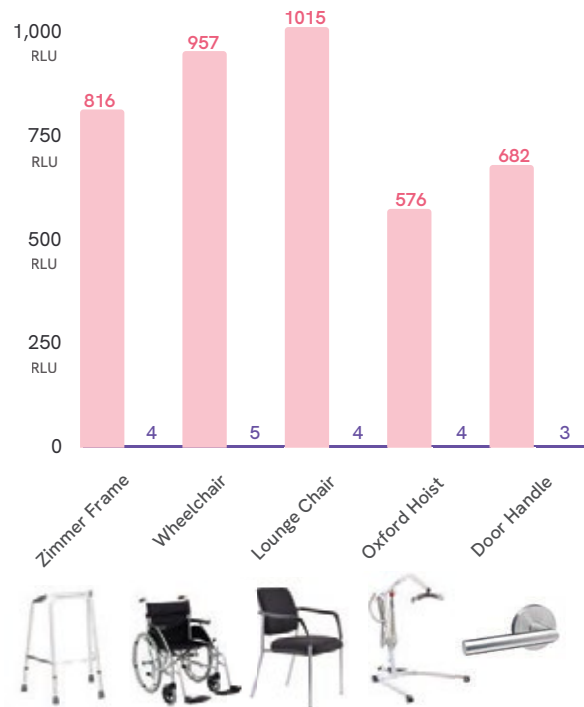

ATP TEST RESULTS

Adenosine Triphosphate (ATP) is an energy-carrying molecule found in the cells of all living things AND is an indicator of surface cleanliness.

ATP testing is used by health inspectors in hospitals clinics, and the hospitality industry to assess the cleanliness of surfaces. A luminometer rapidly detects the presence of ATP molecules on surfaces, measuring the number of bacteria and organic matter present in relative light units (RLU).

The lower the RLU, the cleaner the surface is. Readings below 10 RLU are classed as surgically compliant. VERA cleaned surfaces demonstrated significantly low RLU, meaning that surfaces cleaned with VERA products are deemed surgically sterile.

During testing, results from surfaces cleaned by traditional cleaning products actually scored BELOW the minimum hygiene standard.

Surfaces without VERA Clean (Pink bars)
Surfaces after cleaned with VERA Clean (Purple bars)

1. No Negative Effects on the Human Brain
2. Creates NO Harmful Byproducts
3. Prevents Drug & Alcohol Relapses
4. Harmless for Humans, Animals, and the Environment
5. Improved Mental and Physical Health using only VERA Products

- ✔ Kills 99.9% of bacteria
- ✔ Non-toxic & Chemical FREE
- ✔ 100% Natural
- ✔ Plant-Based
- ✔ Fragrance-FREE
- ✔ Alcohol-FREE
- ✔ Non-Flammable
- ✔ 4-in-1 cleaning
- ✔ Highly potent & effective
- ✔ Fast-acting Cuts cleaning time in half!
- ✔ Sanitises & deodorises
- ✔ Penetrates surfaces 6x stronger than water
- ✔ Anti-fungal
- ✔ Allergy-Friendly
- ✔ Sensitive skin-friendly
- ✔ Animal-Friendly
- ✔ Environmentally-friendly
- ✔ Sustainable
- ✔ Refillable
- ✔ Cost-effective
- ✔ Heavy duty
- ✔ Eliminates odours
- ✔ Removes stains
- ✔ Scientifically proven effective formula

Trialed and tested

TGA-Compliant

Independently certified

NDIS approved consumables

Satisfies occupational health & safety compliance standards

The VERA Cleaning formulation is a germicide! It starves and repels contaminants. These contaminants include:

- ✔ Viruses
- ✔ Bacteria
- ✔ Pathogens
- ✔ Algae
- ✔ Fungi
- ✔ Mould
